

## ABOUT ME

Hi, my name is Nikola Tasic born on 24th of May 1995. I am your standard garden variety software nerd. That means if something has computer code in it I had already read about it or tried to implement it myself. Among the huge range of my interests I would emphasize the Web, networks and scripting languages as my strong points. Regarding Web development I had written servers in 4 languages so far but I tend to default to Node.js for my day to day needs. As for programming my go to languages are JavaScript and Python. I have strong knowledge in GoLang and Java and have recently started learning Rust. Also im a Linux user and a big fan of Arch. Aside from programming I do documentary photography and my photos are regularly uploaded to Instagram by my Python bot. I think I am honest, enthusiastic, easy to work with and more than willing to think outside of the box to solve any problem.

## SKILLS

JavaScript	=====
Python	=====
GoLang	=====
Java	=====
Bash	=====

# Nikola

address: Cirila i Metodija 18/22 18000 Nis, Serbia

phone: +(381) 60 451 40 36

email: ntasic7@gmail.com

## Education

- ❖ elementary – “Vozd Karadjordje Nis” (2002-2010)
- ❖ high school – “Bora Stankovic Nis” (2010-2014)
  - > mathematics department
- ❖ university – “Univerzitet Metropolitani Beograd” (2018-)
  - > software engineering department

## Projects

- ❖ [instapy-bot \(python\)](#)
  - > fully automated uploading bot for Instagram implemented with the fork of instapy-cli
- ❖ [deployment-server \(typescript-express\)](#)
  - > early attempt at continuous deployment server based on Heroku
- ❖ [web-shop \(typescript-express-mongodb\)](#)
  - > basic RESTful API shop with CRUD admin panel
- ❖ [http-server \(golang\)](#)
  - > HTTP server implementation in golang
- ❖ [ld-electron \(typescript-electron-sqlite3\)](#)
  - > work in progress HR application written using electron.js framework

lots of other projects on my GitHub – [7aske](#)
